In my final year of my BSc in Computer Science and Bioinformatics at Ben-Gurion University.

I am seeking an entry-level position, internship, or student position as a Junior Software Developer, with the flexibility to work full-time.

I am adaptable and self-motivated, with a proven ability to learn quickly, work collaboratively, and deliver innovative solutions under tight deadlines.

Skills

- **Object-Oriented Programming & Multithreading Concepts:** Experienced implementing software architectures using OOP principles and efficient multithreading techniques. Proficient in managing synchronization, and parallel execution to enhance performance and resource utilization in complex systems.
- **Programming Languages:** Skilled in Java, C/C++, Python, SQL, and Assembly for developing robust applications and backend services.
- **Python Libraries:** Hands-on experience with Pandas and Flask libraries for data analysis and web development.
- **Frontend Development:** Proficient in HTML, CSS, JavaScript, and Bootstrap for creating responsive and user-friendly web interfaces.

Languages: Hebrew – Native, English - Fluent

Education

BSc in Computer Science and Bioinformatics at Ben-Gurion University.

I strengthened **team management, project management, and technology evaluation** skills while leading initiatives and assessing innovative solutions. Engaging with diverse teams enhanced my **public speaking and collaboration** abilities.

I have been working in dynamic environments strengthened my **problem-solving, adaptability, and time management** skills.

Projects

- **Authentication Site Platform (Python, Flask, SQL) :** Developed a secure authentication platform with Flask and SQLAlchemy. Achieved 20% faster database queries, password hashing, and robust PyTest validation.
- **Client-Server Work (Java, Multithreading):** Built a multithreaded client-server system with Java, supporting multiple concurrent connections. Reduced latency by 35% with optimized thread-safe operations.
- **Set Game (Java, Object-Oriented Design, CSS, and Tokens:** Developed a card game, "Set," using Java, incorporating CSS for enhanced UI/UX and token-based authentication for secure multi-user gameplay.

ARMY Service, Combat Intelligence Unit - 636 From 2015-2019

I served as an combat officer, with my last position being a **platoon commander**.

Under my leadership, I managed three teams comprising a total of approximately 50 soldiers.

Throughout my service, I gained knowledge of advanced technologies and the operation of technological systems.

As part of my role, I was responsible for developing soldiers into command positions, led complex and diverse operational missions and acquired valuable skills such as : time management, working under pressure, and effective leadership in both operational and administrative aspects.

Volunteering – ‘Heroes For Life’, Vietnam , 2019

- Provided essential services to local communities, including teaching, mentoring, and engaging with children.
- Contributed to community development by strengthening social bonds, participating in interfaith dialogues, and assisting in community renovations projects.
- Developed leadership skills, cross-cultural communication, and the ability to drive meaningful social impact.
